# AML Monitoring Dashboard

AMLA DEPARTMENT

# Objectives:

- To automate the collection, analysis, and monitoring of player risk and transaction activity through a centralized AML Monitoring Dashboard, enabling the AML/CFT/CPF Compliance Office to efficiently identify unusual or potentially suspicious activity, automate risk-profiling, prioritize higher-risk cases, and support timely investigation and escalation in accordance with the Company's MTPP.

# AML Monitoring Dashboard Automation Request:

- Automation – Suspicious Transactions tagging and monitoring
- Automation – Risk Profiling
- Automation – Customer Information Updating , CDD & EDD

# Suspicious Transactions tagging and monitoring

- Automate the identification of predefined player and account indicators that may require **Operation validation, enhanced review, or AML escalation**.
- The automation will continuously analyze available **KYC, account, access, and transaction data** and generate alerts when predefined conditions are met.

# List of Red Flags – leading to suspicious transactions (PASED-Advisory No. 2026-004)

- 1. Duplicates
- 2. Attempts to evade inclusion in NDRP
- 3. Government Officials, employee or public-works contractor or connected to such persons
- 4. SOF/SOW does not align with players transaction
- 5. Group Play - same IP address
- 6. Sudden increase of transaction volume
- 7. Dormancy + subsequent deposit or activity
- 8. Uncooperative during EDD

*Any Red-Flag according to the Reason for Suspicion in PSTR Form

| REASON FOR SUSPICION *(check corresponding box as applicable)* | |
|---|---|
| ☐ | Player is not properly identified or refuses to complete or update his KYC information. |
| ☐ | Player is not resemblant to the photo on the presented identification document. |
| ☐ | Player is listed in any of the official local or international watchlists of designated/sanctioned individuals or entities. |
| ☐ | Player's current employer/company is listed in any of the official local or international watchlists of designated/sanctioned individuals or entities. |
| ☐ | Registered Player attempted to open another/duplicate/dummy new account. |
| ☐ | Player's gaming transactions appear to deviate from the player's profile or is not commensurate with his/her income, business, or financial capacity |
| ☐ | Transaction is possibly related to an unlawful activity (that has been committed, is being committed, or is about to be committed) |
| ☐ | Player's bets or cash deposits have drastically changed and might have been exhibiting signs of possible syndicated betting behavior. |
| ☐ | Player's gaming activities have become unusually frequent. |
| ☐ | Player attempted to transact cash in or cash out through another person's account or an account other than his/hers. |
| ☐ | There's a perception that the financial transactions of the player is structured in order to avoid being the subject of reporting with AMLA. |
| ☐ | Player is currently affiliated in any political organizations. |
| ☐ | Player's IP Address during online access is identified as "foreign" or "outside" the Philippines jurisdiction. |
| ☒ | Other Reasons (Player refused or failed to comply with EDD requirements despite repeated requests, preventing verification of the source of funds and financial capacity.) |

# List of Red Flags for Automation

| Red Flag | Automation Explanation | Action |
|---|---|---|
| **1. Duplicate Account** | Detect accounts sharing the same KYC identifiers, mobile number, email, device, payment details, or other defined identifiers. | **Preliminary Suspicious Transaction Reporting** |
| **2. NDRP / Restricted Player** | Automatically match newly registered or existing players against the NDRP/restricted-player list. | **Preliminary Suspicious Transaction Reporting** |
| **3. Same IP Address** | Identify multiple player accounts accessing the platform from the same IP address within a defined period. | **Flag for review** — not automatically suspicious because households, offices, VPNs, or shared networks can produce the same IP. |
| **4. Account dormant for more than 6 months + subsequent deposit/activity** | Identify accounts with no gaming/transaction activity for more than 6 months, followed by a new deposit or other activity. | **Flag when activity resumes** |

# Proposed Automation Flow

1. **Player Activity / KYC Data**
2. **Automated Rules Engine**
3. **Red-Flag Detection**
4. **Alert / Risk Indicator**
5. **Operation Review**
6. **Escalation to AML/CFT/CPF Compliance Office, if warranted**

**Key Principle**

**Automation detects the indicator; Operations determines the appropriate action by escalation to the AML/CFT/CPF Compliance Office.**

This keeps our monitoring system from automatically treating a red flag as an STR or confirmed suspicious activity.

# RISK PROFILING

- As per the CIRR Section 21, Letter A, Customer Risk Assessment - Casinos shall develop clear, written and graduated customer acceptance policies and procedures, including a set of criteria for customers that are likely to pose low, normal, or high risk to their operations.

- Risk Profiling will run at the same time during eKYC. Once the player is done with his registration the system will validate and analyze all the data that was collected during registration and decide of the risk profile of the player.
- For manual registration, they should follow the same principle of deciding the risk profile of the player based on the Risk Factor rules in this presentation.

# Updated Risk Profiling Framework

| Risk Factor | Low | Medium | High |
|---|---|---|---|
| Range of Income | <50k | >50K-100K | >100K |
| Transaction Amount | ≤ PHP 200K | >200K–500K | >500K |
| PEP | Non-PEP | Former/retired PEP | Active PEP / relevant PEP connection |
| Adverse Media | None | Article found during review | Valid Article Relevant adverse media |
| Local Watchlist | No Match | Possible Match | Confirmed Relevant Match |
| Nationality | Filipino | Foreign Resident | Higher-Risk Geographic Exposure |
| Occupation | Regular/ Valid Employment | Self-employed/business/ retired | Higher-Risk Geographic Exposure |

# Automated Risk Factor

| Risk Factor | Low | Medium | High |
|---|---|---|---|
| Range of Income | ≤ PHP 50K | >50K–100K | >100K |
| Date of Birth | 21 years old above | - | Below 21 years old |
| Local Watchlist / NDRP | No Match | Potential Match | Confirmed Relevant Match |
| Nationality | Philippines | Foreigner | Iran, North Korea and Russia |

# Additional Rules for Automation

Reporting Rules:

1. All required KYC fields that are left out by the players during registration equals to High Risk - STR
2. 500k transaction automatic High Risk - CTR
3. Iran and North Korea nationality automatic High - STR
4. Included in NDRP automatic High-Risk - STR
5. Government Employee automatic High-Risk - subject for Suspicious Transaction
6. Underage > Suspicious Transaction

# Source of Funds & Source of Wealth

- Employed > SOF
- Business > SOF
- Remittances > SOF >
- Pension > SOF >
- Personal Savings / Retirement Proceeds > SOF
- Allowance > SOF
- Inheritance> SOW
- Investment/Dividend Income > SOW
- Rental Income > SOF
- Sale of Asset/Property > SOW
- Donation > SOW
- Winnings/redemptions (casino/Lotto/etc.) > SOW
- Others > SOF

# How Automation Will Work

- eKYC collects the required information
- System evaluates each factor
- System generates the applicable risk classification
- Manual KYC follows the same framework

# Proposed End-to-End Workflow

- EKYC > risk engine > risk result > Operation escalation to the AML/CFT/CPF Compliance Office where applicable

**EKYC:** Collects all required player information according to the standard.

**Risk Engine:** Automatically evaluates the player using the **approved risk factors**.

**Risk Result:** Low, Medium, or High risk classification.

**AML Escalation:** Cases requiring further verification or AML assessment, operations shall escalate by reporting PSTR

**For Manual KYC:** apply the same approved risk-profiling criteria manually.

# CUSTOMER INFORMATION UPDATING, CDD & EDD

- As per the CIRR Section 21, Letter B, Ongoing Monitoring of Customers, Accounts and Casino Transactions. – Casinos shall, on the basis of materiality and risk, update all customer information and identification documents of existing customers required to be obtained under the AMLA, this CIRR, and other applicable issuances of the AMLC and the AGA

- Parameters to be considered for periodic updating of customer information, CDD (reduced, normal), EDD.

| Low Risk | Medium Risk | High Risk |
|---|---|---|
| Every 2 Years | Annual | Every 6 Months |

Thank you!
